## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 is indefinite due to the use of "predetermining". The word "predetermining" does not reasonably convey to one of ordinary skill in the art because it embraces steps that are unrecited and possibly undisclosed.

Claim 3 is further indefinite because it is unclear to the examiner as to whether 'determining the ratio of LMW HDPE homopolymer to HMW copolymer' and 'determining the MI of the mixture' are two additional steps following the step of selecting at least one of a LMW HDPE homopolymer. If this is what applicant means to indicate, please state so.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(c) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Art Unit: 1711

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Cheruvu et al. (US Pat. 6,194,520).

Cheruvu teaches a high density ethylene polymer blend and a method of preparing, the polymer blend comprising a relatively high molecular weight component homopolymer (HMW) and a relatively low molecular weight component copolymer (LMW) with a weight ratio of the HMW of at least 0.3% weight fraction or each component being about 0-15% weight percent based on the total weight of each other; the polymer blend having a density, a melt index, and an ESCR of at least about 300 hrs (see abstract; col 3, ln. 46-53; col 4, ln. 15-18, ln. 46; claims 5-11).

The polymer blend is formed into a shape (article or bottle) having a density of 956 g/cc or no higher than 958 g/cc, a melt index of 0.2 (see claims 5, 9).

Cheruvu is silent with respect to the flexural modulus, tensile strength, and notched constant tensile load of the article being formed. However, since Cheruvu teaches the same polymer blend, it would be inherent that the article would have the same properties, such as the flexural modulus, tensile strength, and notched constant tensile load as those in the presently claimed invention.
